

WHO WE ARE

Since 2016, The Sage Hawk Foundation has been a nonprofit dedicated to bringing free computer literacy to impoverished Native Americans all over the United States. Supported entirely by grants, our goal is to bring hope and opportunities to those who have fallen behind the technological curve.

At the moment, **Sage Hawk is unique**. There's no program dedicated to Native Americans that delivers the content that we do in the format that we provide.

We teach from the ground up, so you don't need any prior knowledge of computers. You only need to bring three things: **the ability to read, write, and a genuine desire to learn and improve yourself**. The training we provide will help students to realize their dreams and build up their community one step at a time.

OSU Extension Building - Sage Hawk 2019 Course Location

OUR CURRICULUM

Over a 3-month course, we cover subjects that help students find a foothold in the world of digital computing and gain valuable, employable skills:

- ✦ A Brief History of Computers
- ✦ Binary Computer Mathematics
- ✦ Operating Systems
- ✦ Introduction to Windows 10
- ✦ Microsoft Office Suite
- ✦ Introduction to Financial Literacy
